EDUCATION:

Master of Science, Information Systems

Northeastern University.

Dec 2024

GPA: 3.75

Relevant Courses: Data Structures and Algorithms, Web Design, Quality Assurance, Application Development.

Bachelor of Engineering, Information Technology

Pune University, Pune, India.

Jun 2020

GPA: 3.70

TECHNICAL SKILLS:

Programming Languages: C, C#, C++, Python, Java, .NET, R, JavaScript.

Web Technologies: HTML5, CSS3, SASS, Angular, JQuery, React.js, Redux, JSON, AJAX.

Databases: MySQL, MongoDB, Postgres, Oracle 11g, MS SQL Server.

Tools and Frameworks: AWS, GitHub, Bitbucket, Jira, GCP, Heroku, Excel, Docker.

Operating Systems: Linux, Unix, MacOS

WORK EXPERIENCE:

Senior Software Engineer, Capgemini, Bangalore India

Nov 2020 – Sep 2022

- Collaborated with a cross-functional team to create an employee performance analytics tool, increasing efficiency by 21%.
- Took ownership of critical projects, inception to execution, resulting in successful outcomes and increased accountability.
- Executed 20+ **SpringBoot** microservices along with **AngularJS** and **ReactJS** for building applications.
- Fostered **Agile**-blended software development which enhanced communication and embraced change.
- Implemented 3 front-end features, login authentication and raising training requests with **JavaScript** for company's website.

Software Engineer Intern, Capgemini, Pune, India

Jan 2020 – Nov 2020

- Collaborated with the team and took an **initiative** to develop a responsive website to reduce third party application costs.
- Interacted extensively with **J2EE FullStack** development and **ReactJS**, **React Native** to build and customize web applications.
- Coordinated with DevOps Engineer to build data pipelines using **Informatica ETL** tool and **MATLAB** for numerical computing.
- Implemented CI/CD pipelines with **Jenkins** and **Docker**, resulting in a 30% reduction in manual testing time.

Software Engineer Intern, Kasnet Technologies, Pune, India

Jul 2019 – Dec 2019

- Cleaned and organized extensive school data with **SQL**, leveraging indexing and hashing, and 17% redundancy elimination.
- Executed **map-reduce** for database optimization and improved retrieval speed by 20% through indexing.
- Displayed a passion for learning and staying updated with the latest industry trends, fostering innovation and adaptability.

Software Engineer Intern, HackMaynia, Pune, India

Aug 2018 – Jul 2019

- Significantly improved website responsiveness by reducing visual load, implementing animations, and 3 subtle features.
- Created a session notepad feature, leading to a 30% rise in user engagement, and enhancing the website's functionality.
- Adapted swiftly to thrive in a dynamic, collaborative, high-speed product development environment.

PROJECTS:

AR Furniture App

Oct 2024

- Transformed furniture retail with an **iOS app**, enabling customers to visualize and purchase products through AR.
- Integrated **machine learning** models into iOS apps, improving recommendation accuracy by 30%.
- Developed an IOS/IPAD OS app to search furniture with custom filters with **React native**, **CSS3** and **HTML5**.

Journey Genius - [GitHub](#)

Jun 2023

- Devised 3 novel algorithms in **backend** for the NP-hard traveling salesman problem, reducing the distance traveled by 37%.
- Analyzed and resolved bugs, vulnerabilities, security hotspots, ensuring quality assurance with **SonarQube** and **Unit tests**.
- Connected **BigQuery** data warehouse to store vast amounts of geographically organized data and real-time data streaming.

FreshHarvests - [GitHub](#)

Apr 2023

- Programmed supermarket website with secure authentication and **Paypal** integration, ensuring seamless online transactions.
- Deployed website on **Google Cloud Platform** majored by **MERN Stack**, reducing response time to 12ms.
- Utilized **ReactJS** animations for enhanced user interface and achieved 95% customer satisfaction.
- Winner of the best project award for bringing the proposal to the institution stores to utilize instead of unofficial channels.

Task Pulse - [GitHub](#)

Aug 2022

- Developed an annotated **SpringBoot** Rest controller to track and analyze unorganized task executions.
- Engineered and automated **Postman** testing for **REST APIs**, email, text notifications, testing, and **Elasticsearch** for analytics.
- Created a chatbot using **JavaScript** and ML model, resulting in a 30% decrease in customer support response time.
